

RPCI ONCOLOGY PC

Dermatopathology Division

Fast, accurate, pathologic diagnosis of cancer and nonmalignant skin diseases by the region's premiere dermatopathology experts

A subspecialty pathology lab affiliated with the region's only **National Cancer Institute-designated comprehensive cancer center** and dedicated to providing diagnostic services to our colleagues in the community.

Offering customer service of a local laboratory, direct access to our dermatopathologists and participation with local insurance companies

WHAT SETS US APART

- **Uniquely qualified team** of fellowship-trained, academic dermatopathologists
- **Diagnostic expertise** for all dermatologic conditions including:
 - Melanoma and difficult pigmented lesions
 - Cutaneous lymphoma
 - Benign and malignant skin tumors
 - Rashes
 - Alopecia and nail disorders
- **Access to Roswell Park's comprehensive pathology team**, including soft tissue pathology, head and neck pathology, and hematopathology for consultation with difficult cases
- **Access to ancillary diagnostic resources** from a nationally recognized, state-of-the-art, tertiary referral pathology laboratory
- **Accurate, concise pathology reports** with EMR integration

We are an integrated group of both pathology- and dermatology-trained dermatopathologists with strong background in clinical dermatology.

Meet the Team

We are dedicated to diagnostic excellence. We share cases at daily academic and consensus conferences to leverage our unique and combined academic expertise to reach accurate diagnoses for even the most challenging cases.

We value collaborative relationships with our clinical colleagues. When you need to discuss report findings, you can be certain you will receive direct and prompt access to our dermatopathologists. Finally, we are committed to education and innovation, and have published numerous academic papers to advance the field of dermatopathology.
